Planetary and Space Science
Volume 48

JANUARY

Hughes, D. W. — **On the velocity of large cometary dust particles 1**

Chian, A. C. L., Borotto, F. A., Lopes, S. R., Abalde, J. R. — **Chaotic dynamics of nonthermal planetary radio emissions 9**

Winter, O. C. — **The stability evolution of a family of simply periodic lunar orbits 23**

Song, P., Gombosi, T. I., DeZeeuw, D. L., Powell, K. G., Groth, C. P. T. — **A model of solar wind–magnetosphere–ionosphere coupling for due northward IMF 29**

Morgan, D. D., Menietti, J. D., Winglee, R. M., Wong, H. K. — **Perpendicular electron heating by absorption of auroral kilometric radiation 41**

Rishbeth, H., Yelle, R. V., Mendillo, M. — **Dynamics of Titan's thermosphere 51**

Pravec, P., Šarounová, L., Wolf, M., Ferrin, I. R. V., Zhu, J. — **CCD photometry of asteroids (4197) 1982 TA and 1997 LY_4 59**

Titov, D. V., Fedorova, A. A., Haus, R. — **A new method of remote sounding of the Martian aerosols by means of spectroscopy in the 2.7 μm CO_2 band 67**

Basilevsky, A. T., Head, J. W. — **Geologic units on Venus: evidence for their global correlation 75**

Book Review 113

Erratum 115

FEBRUARY/MARCH

Li, F., Havnes, O. — **Low frequency dust wave modes in planetary rings 117**

Das, A. C., Ip, W.-H. — **Field aligned current and particle acceleration in the near-Io plasma torus 127**

Leubner, M. P. — **Wave induced suprathermal tail generation of electron velocity space distributions 133**

Podolak, M., Podolak, J. I., Marley, M. S. — **Further investigations of random models of Uranus and Neptune 143**

Tao, J., Qian, B.-c., Gu, M.-f., Tang, Y., Song, B.-j. — **Observation of an outburst of comet Hale–Bopp in September 1996 153**

Mamun, A. A., Russell, S. M., Mendoza-Briceno, C. A., Alam, M. N., Datta, T. K., Das, A. K. — **Multi-dimensional instability of electrostatic solitary structures in magnetized nonthermal dusty plasmas 163**

Sorokin, V. M., Chmyrev, V. M., Hayakawa, M. — **The formation of ionosphere–magnetosphere ducts over the seismic zone 175**

Westall, F., Brack, A., Hofmann, B., Horneck, G., Kurat, G., Maxwell, J., Ori, G. G., Pillinger, C., Raulin, F., Thomas, N., Fitton, B., Clancy, P., Prieur, D., Vassaux, D. — **An ESA study for the search for life on Mars 181**

Cockell, C. S. — **The ultraviolet history of the terrestrial planets — implications for biological evolution 203**

Allison, M., McEwen, M. — **A post-Pathfinder evaluation of areocentric solar coordinates with improved timing recipes for Mars seasonal/diurnal climate studies 215**

Vacher, J. R., Le Duc, E., Fitaire, M. — **Clustering reactions of $HCNH^+$, $HCNH^+(N_2)$ and $HCNH^+(CH_4)$ with ethane: application to Titan atmosphere 237**

Book Review 249

Personal Review of Planetary Pionneers 251

APRIL

Blanco, C., Di Martino, M., Riccioli, D. — **New rotational periods of 18 asteroids 271**

Clarke, D., Naghizadeh-Khouei, J. — **Polarimetric studies of rotational Raman scattering (the Ring effect) in the zenith sky 285**

Binzel, R. P. — **The Torino Impact Hazard Scale 297**

Mothé-Diniz, T., Gomes, R. S. — **Corotation resonances and planetary formation 305**

Rossi, A., Valsecchi, G. B., Farinella, P. — **Collision risk for high inclination satellite constellations 319**

Trigo-Rodriguez, J. M., Sanchez-Lavega, A., Gomez, J. M., Lecacheux, J., Colas, F., Miyazaki, I. — **The 90-day oscillations of Jupiters Great Red Spot revisited 331**

Petkaki, P., Dougherty, M. — **Wave signatures in the Jovian magnetosphere 341**

Planetary Pioneers
Goody, R. — **An early view of Earth and planetary atmospheres 351**

Book review 357

APRIL

Special Issue

LABORATORY INVESTIGATIONS SUPPORTING PLANETARY SPACE MISSIONS

Ehrenfreund, P., Kochan, H. — **Preface 359**

Hilchenbach, M., Küchemann, O., Rosenbauer, H. — **Impact on a comet: Rosetta Lander simulations 361**

Rotundi, A., Rietmeijer, F. J. M., Brucato, J. R., Colangeli, L., Mennella, V., Palumbo, P., Bussoletti, E. — **Refractory comet dust analogues by laser bombardment and arc discharge production: a reference frame for "dusty experiments" on-board ROSETTA 371**

Kochan, H., Feibig, W., Konopka, U., Kretschmer, M., Mohlmann, D., Seidensticker, K. J., Arnold, W., Gebhardt, W., Licht, R. — **CASSE — The ROSETTA Lander Comet Acoustic Surface Sounding Experiment — status of some aspects, the technical realisation and laboratory simulations 385**

Amici, S., Piccioni, G., Coradini, A., Solazzo, S. — **VIRTIS-M laboratory spectral measurements of analogues cometary samples 401**

Piccioni, G., Amici, S., Fonti, S., Coradini, A., Capaccioni, F., Dami, M. — **Efficiency measurements of the VIRTIS-M grating 411**

Lorenz, R. D., Moersch, J. E., Stone, J. A., Morgan Jr, A. R., Smrekar, S. E. — **Penetration tests on the DS-2 Mars microprobes: penetration depth and impact accelerometry 419**

Gazeau, M.-C., Cottin, H., Vuitton, V., Smith, N., Raulin, F. — **Experimental and theoretical photochemistry: application to the cometary environment and Titan's atmosphere 437**

Balucani, N., Asvany, O., Osamura, Y., Huang, L. C. L., Lee, Y. T., Kaiser, R. I. — **Laboratory investigation on the formation of unsaturated nitriles in Titan's atmosphere 447**

Benilan, Y., Smith, N., Jolly, A., Raulin, F. — **The long wavelength range temperature variations of the mid-UV acetylene absorption coefficient 463**

Haus, R., Titov, D. V. — **Sensitivity of temperature retrieval in the Martian atmosphere to transmittance simulation accuracy and instrumental noise 473**

Kaiser, R. I., Asvany, O., Lee, Y. T. — **Crossed beam investigation of elementary reactions relevant to the formation of polycyclic aromatic hydrocarbon (PAH)-like molecules in extraterrestrial environments 483**

Worms, J.-C., Renard, J.-B., Hadamcik, E., Brun-Huret, N., Levasseur-Regourd, A. C. — **Light scattering by dust particles with the PROGRA$_2$ instrument — comparative measurements between clouds under microgravity and layers on the ground 493**

Horneck, G., Reitz, G., Rettberg, P., Schuber, M., Kochan, H., Möhlmann, D., Richter, L., Seidlitz, H. — **A ground-based program for exobiological experiments on the International Space Station 507**

Paille, Ch., Albiol, J., Curwy, R., Lasseur, Ch., Godia, F. — **FEMME: a precursor experiment for the evaluation of bioregenerative life support systems 515**

Fonti, S., Solazzo, S., Blanco, A., Orofino, V. — **An infrared zoom for space applications 523**

MAY

Lammer, H., Stumptner, W., Molina-Cuberos, G. J., Bauer, S. J., Owen, T. — **Nitrogen isotope fractionation and its consequence for Titans atmospheric evolution 529**

Gil-Hutton, R. **Collisional rates and impact velocities of short-period comets with interplanetary particles 545**

Ohtsuki, K. **Evaluation of collision and stirring rates in circumplanetary particle disks based on three-body orbital integrations 553**

Formisano, V., Grassi, D., Piccioni, G., Pearl, J., Hanel, R., Bjoraker, G., Conrath, B. **IRIS Mariner 9 data revisited: 1. An instrumental effect 569**

Grassi, D., Formisano, V. **IRIS Mariner 9 data revisited: 2. Aerosol dust composition 577**

Mendoza-Briceno, C. A., Russel, S. M., Mamun, A. A. **Large amplitude electrostatic solitary structures in a hot non-thermal dusty plasma 599**

Ghosh, S., Sarkar, S., Khan, M., Gupta, M. R. **Effect of finite ion inertia and dust drift on small amplitude dust acoustic soliton 609**

JUNE/JULY

Special Issue

NANTES SYMPOSIUM PART II

Gautier, D., Owen, T. **Preface 615**

Grasset, O., Sotin, C., Deschamps, F. **On the internal structure and dynamics of Titan 617**

Li, X., Read, P. L. **A mechanistic model of the quasi-quadrennial oscillation in Jupiter's stratosphere 637**

Nellis, W. J. **Metallization of fluid hydrogen at 140 GPa (1.4 Mbar): implications for Jupiter 671**

Griv, E., Gedalin, M., Eichler, D., Yuan, C. **A gas-kinetic stability analysis of self-gravitating and collisional particulate disks with application to Saturn's rings 679**

Ollivier, J. L., Dobrijévic, M., Parisot, J. P. **New photochemical model of Saturn's atmosphere 699**

Kuskov, O. L., Kronrod, V. A. **Resemblance and difference between the constitution of the Moon and Io 717**

Leliwa-Kopystyński, J., Kossacki, K. J. **Evolution of porosity in small icy bodies 727**

Owen, T. C. **On the origin of Titan's atmosphere 747**

Allison, M. **A similarity model for the windy jovian thermocline 753**

Ip, W.-H. **Thermal plasma composition in Saturn's magnetosphere 775**

AUGUST

Special Issue

TORINO IMPACT WORKSHOP

Cellino, A. — **Editorial**

The Torino IMPACT Workshop 785

Tichá, J., Tichý, M., Moravec, Z. — **Klet' Observatory NEO follow-up programme 787**

Isobe, S. — **The position of the Japanese Spaceguard Association with regard to NEO problems 793**

Huebner, W. F., Greenberg, J. M. — **Needs for determining material strengths and bulk properties of NEOs 797**

Tedesco, E. F., Muinonen, K., Price, S. D. — **Space-based infrared near-Earth asteroid survey simulation 801**

REGULAR PAPERS

Giuliatti Winter, S. M., Murray, C. D., Gordon, M. — **Perturbations to Saturn's F-ring strands at their closest approach to Prometheus 817**

Greeley, R., Klemaszewski, J. E., Wagner, R., the Galileo Imaging Team — **Galileo views of the geology of Callisto 829**

Bronshten, V. A. — **Nature and destruction of the Tunguska cosmical body 855**

Pérez de Tejada, H. — **Acceleration of ionospheric plasma clouds in the Venus ionosheath 871**

AUGUST

Special Issue

ASTEROIDS, COMETS, METEORS (ACM) CONFERENCE

Clark, B. E. — **Editorial 885**

Keil, K. — **Thermal alteration of asteroids: evidence from meteorites 887**

Lindblad, B.A. — **A long-term high-resolution study of the visual activity curve of the Perseid meteor stream 1953–1983 905**

Fisher, A. A., Hawkes, R. L., Murray, I. S., Campbell, M. D., LeBlanc, A. G. — **Are meteoroids really dustballs? 911**

Tatum, J. B., Parker, L. C., Stumpf, L. L. — **Sound from a fireball — distinguishing between the hypersonic shock front and the terminal burst 921**

Beech, M., Brown, P. — **Fireball flickering: the case for indirect measurement of meteoroid rotation rates 925**

Svoreň, J., Neslušan, L., Porubčan, V. — **A search for streams and associations in meteor databases. Method of indices 933**

Boattini, A., Forti, G. — **The recovery of near-Earth asteroids 939**

Milani, A., Chesley, S. R., Valsecchi, G. B. — **Asteroid close encounters with Earth: risk assessment 945**

Tichá, J., Tichý, M., Moravec, Z. — **The importance of follow-up observations for newly discovered NEOs 955**

Pauwels, T., Elst, E. W. — **The RUSTICCA project 961**

Scheeres, D. J., Khushalani, B., Werner, R. A. — **Estimating asteroid density distributions from shape and gravity information 965**

Blanco, C., Cigna, M., Riccioli, D. — **Pole and shape determinaton of asteroids. II 973**

Denchev, P., Shkodrov, V., Ivanova, V. — **Synodic periods of asteroids 333, 402, 481, and 800 983**

Denchev , P. — **Photometry of 11 asteroids during their 1998 and 1999 apparitions 987**

Ozernoy, L. M., Gorkavyi, N. N., Taidakova, T. — **Four cometary belts associated with the orbits of giant planets: a new view of the outer solar system's structure emerges from numerical simulations 993**

Kiselev, N. N., Jockers, K., Rosenbush, V. K., Velichko, F. P., Bonev, T., Karpov, N. — **Anomalous wavelength dependence of polarization of Comet 21P/Giacobini-Zinner 1005**

Whipple, F. L. — **Oort-Cloud and Kuiper-Belt comets 1011**

MARS EXPLORATION PROGRAM AND SAMPLE RETURN MISSIONS

Sotin, C., Rocard, F., Lognonne, Ph. — **Editorial**
Summary of the International Conference on Mars Exploration Program & Sample Return Missions 1143

Hoolst, T. V., Dehant, V., Defraigne, P. — **Chandler wobble and Free Core Nutation for Mars 1145**

Glassmeier, K.-H., Musmann, G., Vocks, C., Menvielle, M. — **Mars — a planet in magnetic transition? 1153**

Berthelier, J.J., Ney, R., Costard, F., Hamelin, M., Meyer, A., Martinat, B., Reineix, A., Hansen, Th., Bano, M., Kofman, W., Lefeuvre, F., Paillou, P. — **The GPR experiment on NETLANDER 1161**

Trotignon, J.G., Parrot, M., Cerisier, J.C., Menvielle, M., Axford, W.I., Paëtzold, M., Warnant, R., Wernik, A.W. — **The plasma environment of Mars: from the shocked solar wind down to the ionosphere 1181**

Berthelier, J.J., Grard, R., Laakso, H., Parrot, M. — **ARES, atmospheric relaxation and electric field sensor, the electric field experiment on NETLANDER 1193**

Mangold, N., Allemand, P., Thomas, P.G., Vidal, G. — **Chronology of compressional deformation on Mars: evidence for a single and global origin 1201**

Treiman, A.H., Gleason, J.D., Bogard, D.D. — **The SNC meteorites are from Mars 1213**

Menvielle, M., Musmann, G., Kuhnke, F., Berthelier, J.-J., Glassmeier, K.-H., Mandea, M.H., Motschmann, U., Pajunpaa, K., Pinçon, J.-L., Primdahl, F., Szarka, L. — **Contribution of magnetic measurements onboard NetLander to Mars exploration 1231**

Mocquet, A., Menvielle, M. — **Complementarity of seismological and electromagnetic sounding methods for constraining the structure of the Martian mantle 1249**

Pinçon, J.-L., Menvielle, M., Szarka, L. — **Geomagnetic induction study using the NetLander network of magnetometers 1261**

Erard, S. — **The 1994–1995 apparition of Mars observed from Pic-du-Midi 1271**

Lognonné, P., Giardini, D., Banerdt, B., Gagnepain-Beyneix, J., Mocquet, A., Spohn, T., Karczewski, J.F., Schibler, P., Cacho, S., Pike, W.T., Cavoit, C., Desautez, A., Favède, M., Gabsi, T., Simoulin, L., Striebig, N., Campillo, M., Deschamp, A., Hinderer, J., Lévéque, J.J., Montagner, J.P., Rivéra, L., Benz, W., Breuer, D., Defraigne, P., Dehant, V., Fujimura, A., Mizutani, H., Oberst, J. — **The NetLander very broad band seismometer 1289**

Bertaux, J.-L., Fonteyn, D., Korablev, O., Chassefière, E., Dimarellis, E., Dubois, J.P., Hauchecorne, A., Cabane, M., Rannou, P., Levasseur-Regourd, A.C., Cernogora, G., Quemerais, E., Hermans, C., Kockarts, G., Lippens, C., De Maziere, M., Moreau, D., Muller, C., Neefs, B., Simon, P.C., Forget, F., Hourdin, F., Talagrand, O., Moroz, V.I., Rodin, A., Sandel, B., Stern, A. — **The study of the Martian atmosphere from top to bottom with SPICAM light on Mars Express 1303**

Lefeuvre, F., Lagoutte, D., Menvielle, M. — **On the use of the wave distribution function concept to determine the directions of arrivals of radar echoes 1321**

Raynal, P.I., Quirico, E., Borg, J., Deboffle, D., Dumas, P., d 'Hendecourt, L., Bibring, J.-P., Langevin, Y. — **Synchrotron infrared microscopy of micron-sized extraterrestrial grains 1329**

Orofino, V., Blanco, A., Blecka, M.I., Fonti, S., Jurewicz, A. **Carbonates and coated particles on Mars 1341**

Greeley, R., Wilson, G., Coquilla, R., White, B., Haberle, R. **Windblown dust on Mars: laboratory simulations of flux as a function of surface roughness 1349**

Haus, R., Titov, D.V. **PFS on Mars Express: preparing the analysis of infrared spectra to be measured by the Planetary Fourier Spectrometer 1357**

Jaumann, R., Langevin, Y., Hauber, E., Oberst, J., Grothues, H.-G., Hoffmann, H., Soufflot, A., Bertaux, J.-L., Dimarellis, E., Mottola, S., Bibring, J.-P., Neukum, G., Albertz, J., Masson, P., Pinet, P., Lamy, P., Formisano, V. **The Mars NetLander panoramic camera 1377**

Lellouch, E., Encrenaz, T., de Graauw, T., Erard, S., Morris, P., Crovisier, J., Feuchtgruber, H., Girard, T., Burgdorf, M. **The 2.4–45 μm spectrum of Mars observed with the Infrared Space Observatory 1393**

Polkko, J., Harri, A.-M., Siili, T., Angrilli, F., Calcutt, S., Crisp, D., Larsen, S., Pommereau, J.-P., Stoppato, P., Lehto, A., Malique, C., Tillman, J.E. **The NetLander atmospheric instrument system (ATMIS): description and performance assessment 1407**
